Nikshith Gurram

nikshithgurram2006@gmail.com — +91 75697 78915 — Hyderabad
LinkedIn — GitHub

SKILLS

Programming
Java, Python, C, C++, JavaScript, SQL

Software Engineering
SDLC, OOP, Data Structures Algorithms, Software Testing, Debugging, Git, REST APIs

Software Development
React.js, HTML, CSS, Flask, FastAPI, REST APIs, Node.js, Git, GitHub

Databases
MySQL, PostgreSQL, SQLite, MongoDB

Cloud/Devops
AWS, Docker, Kubernetes, Linux, CI/CD, GitHub Actions

AI/Data
Machine Learning, Pandas, NumPy, Scikit-learn, Data Analysis, Model Evaluation

Core Computer Science
DBMS, Computer Networks, Operating Systems, Computer Architecture

Security
Authentication, Authorization, RBAC, JWT, Cryptography, OWASP

Tools
VS Code, Wireshark, Nmap, OpenSSL, Power BI, Docker, Kubernetes, Tableau, Vercel, Netlify

EDUCATION

B.Tech in Computer Science and Engineering
Amrita Vishwa Vidyapeetham, Coimbatore (2023-2027)

Intermediate (HSC)
New Vision Junior College
Percentage: 95.5%

SSC
Srividya Vidyalayam
CGPA: 10.0

EXTRA-CURRICULAR

- Coordinator – National Service Scheme (NSS) and Anokha Tech Fest
- Participated in technical and social initiatives, collaborating with diverse teams during university events.

CAREER OBJECTIVE

Computer Science undergraduate with hands-on experience in software development, Python, Java, SQL, REST APIs and full-stack development. Strong foundation in DSA, OOP, DBMS, CN, OS, and SDLC concepts. Experienced in designing, developing, testing, and deploying software applications using modern development tools and frameworks. Seeking to contribute analytical problem-solving and engineering skills as an Associate System Engineer.

EXPERIENCE

Bluestock.in Jul–Sep 2025
Software Developer Intern

- Developed Python- and SQL-based data analysis tools using Pandas to process 10,000+ financial records and automate analytical workflows.
- Implemented ML models achieving 90%+ prediction accuracy for recommendation tasks & systems improving analytical insights

PROJECTS

EduAnalytics: AI-Powered Full-Stack Student Analytics Platform Jan – May 2026

- Developed an AI-powered student analytics platform using Python, Pandas, and React to analyze 5,000+ student records and generate 100+ automated analytical reports.
- Applied data analysis and machine learning techniques to identify student performance patterns and generate actionable insights through interactive dashboards.

Federated Social Networking Platform for Decentralized Identities Dec 2025 – Apr 2026

- Built a federated social networking platform using Go, React, and ActivityPub, demonstrating distributed-system and full-stack development concepts.
- Implemented a multi-service Docker architecture and optimized QA workflows, achieving a 99.6% test pass rate across 260+ test cases.

Smart Healthcare System with Cloud-Fog and Edge Computing Jul–Sep 2025

- Developed an IoT-based healthcare monitoring system integrating cloud, fog, and edge computing for real-time patient data processing.
- Implemented distributed processing and intelligent resource allocation across cloud, fog, and edge layers to prioritize critical healthcare workloads and reduce response latency by up to 60

CERTIFICATIONS

- Machine Learning – Internshala
- Data Analytics - Coursera
